EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Abstract

- (1) The abstract should be written on a single page.
- (2) On line 2 from the bottom, "F2" should be – f2 --.

Fully amended text is given below:

ABSTRACT

A compact and light-weighted projection lens system that is capable of projecting an image at an angle as wide as 75 degrees with sufficient field angle and brightness as represented by an F number of approximately 2.4, that is capable of effectively correcting chromatic aberration of magnification and aberration of distortion and exhibiting optical stability against environmental variations, and is suitable for obtaining an extraordinarily fine image by magnification and projection. In the projection lens system that comprises first to third groups of lenses in the order from the closest a magnified image where the first lens group of negative refractive power includes one or more aspherical lenses each having an aspherical plane on one or both of the surfaces, the second lens group of positive refractive power includes one or more positive lenses, and third lens group of positive refractive power includes one or more cemented triplet lenses comprised of three lenses of positive, negative, and positive attributes joined in this order, a projection lens system is characterized by terms and conditions defined as in the following formulae:

$$(1) \quad 0.9 < |f_1|/f < 1.4$$

$$(2) \quad 2.1 < f_2/f < 3.4$$

$$(3) \quad 1.9 < f_3/f < 2.8$$

where f is a total focal length throughout the projecting lens system, f_1 is a focal length of the first group of lenses, f_2 is a focal length of the second group of lenses, and f_3 is a focal length of the third group of lenses.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: While most of the references cited contain three groups of lenses arranged in the order of negative, positive and positive refractive powers, respectively, they fail to have the characteristic of the third group of lenses of the present invention, the disposition of aspherical planes, and more importantly, the terms and conditions as defined in the formulae given in the (sole) independent claim 1 as to relationship between focal lengths.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Loha Ben whose telephone number is (571) 272-2323. The examiner can normally be reached on Monday to Saturday, generally between 12:00 noon and 8:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y. Epps, can be reached on Monday to Friday, at (571) 272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
